ALUMINUM BALUSTRADES

# ANODISED ALUMINUM BALUSTRADES

Our firm specializes in the manufacturing and sales of modern aluminum railing systems. In our offer we have balustrades to luxury hotels, apartments and office buildings as well as simpler and also more achievable solutions for housing.

We manufacture our products with passion - we make them durable, safe and aesthetic. We don't only meet the technical and safety standards, but also to make our balustrades eye-catching. Our goal is to give your building exterior modern look and our railings make it possible.

## SAFE AND ROBUST

Our products are made of anodised aluminum - weatherproof, durable and easy to maintain.

All our systems are manufactured based on structural calculations and are fully compliant with safety regulations. We use only safe glass infills with Declarations of Conformity from the glassworks.

## EASY TO INSTALL

System design allows our balustrades to be fitted to the expected length and position on site. They don't require welding and are assembled by bolts and rivets.

This solution simplifies the installation and significantly reduces installation time.

## HIGHLY ADAPTABLE

Our railings can be used externally or internally. They can be fitted on the side or on the surface of the balcony slab.

Infills can be fitted inside handrails, system profiles, aluminum frames or glass clamps.

You can combine several system components to get the balustrade you need.

## MODERN DESIGN

We design our balustrades to last, without noticeable differences in the appearance.

Simple shapes, glass infills and satin finish perfectly compose with modern exteriors.

We can provide wide range of infill types such as glass, balusters, perforated panels or HPL boards in multiple colour variants.

## **BECOME OUR PARTNER!**

If you are looking for safe, robust, weather-resistant and simultaneously modern aesthetic aluminum balustrades - you don't need to look further.

We are willing to establish cooperation with developers, architects and construction or railing installation businesses, offering a proven and easy to install aluminum balustrades system.

Each of our products can be adapted to construction projects and the vision of the designer.

Check our website to learn more about our products. If you want to ask some additional questions, please contact our sales representative.
